## About InfectoPharm

InfectoPharm Arzneimittel und Consilium GmbH specializes in the initial and further development of pharmaceuticals. Over the last 35 years, this family-owned German company has established itself as a groundbreaking pioneer in the industry. The portfolio currently comprises about 130 preparations – including numerous innovations in the fields of pediatrics, infectious diseases, pulmonology, dermatology, allergology, and otolaryngology – which are increasingly gaining international recognition. The “*consilium* service” provides impartial consulting and knowledge transfer to healthcare professionals, free of charge.

The InfectoPharm Group has branches in Austria, Italy, and France, as well as two strategically complementary subsidiaries in Germany: Pädia GmbH with its distinct pediatric OTC portfolio, and Beyvers GmbH as an internationally known full-service supplier for pharmaceuticals and cosmetics. The group has more than 400 employees and posts an annual turnover of approximately 275 million euros (2023), with an average growth rate of 10 percent. InfectoPharm regularly receives awards from the medical community, such as the "Golden Tablet", and from the business sector, for example as the "Most Crisis-Proof Employer", "Most Crisis-Proof Company", and "Most Innovative Company".
